Plants tied in bundles of about 100. Please remember that we buy and sell onion plants by the bundle, not by plant count. We will not be responsible for the actual number of plants per bundle. In Texas they are pulled by the handful and each handful is called a bundle.

Around April 15th is the usual time for shipping out of here and the onion plant season closes the last week in May. We will try to get your plants to you when you want them but weather and transportation may upset our plants. Please place your order early.
